

### **Bob Jones University Investigation Update - November 2013**

As many of you are aware, the GRACE team has continued its work throughout the summer months on matters arising out of the scope of this investigation. As we enter the final months of 2013, GRACE continues to request interviews, meet with individuals who possess relevant information, collect and review witness statements and other documents, and request any other materials or information pertinent to the investigation.

Thus far, the GRACE team has completed approximately 80 in person interviews in Greenville and in Charlotte, conducted numerous phone interviews with individuals throughout the country, and reviewed all written statements and other materials submitted to us. GRACE will continue to receive information from anyone wishing to communicate with our team regarding the scope of this investigation.

Once this part of the investigatory phase is complete, the team will begin drafting the Final Report. If this process continues to progress at the same pace, GRACE anticipates completing and publishing the Final Report in the early part of 2014.

GRACE is extremely thankful to so many individuals who have cooperated and communicated candidly with our team. We also continue to be appreciative of Bob Jones University for its continued support of this historical independent process. Should anyone desire to communicate with GRACE about this investigation, please feel free to contact us directly at [grace.bobjones@netgrace.org](mailto:grace.bobjones@netgrace.org).

We are grateful for the continued encouragement and support as we make press forward with this investigation.
